- Provides opportunities for inquiry and research that includes activities such as self-selecting topics, formulating authentic questions, gathering information, researching resources, observing, interviewing, and evaluating information, analyzing and synthesizing data and communicating findings and conclusions.
  - Requires students to use higher-level cognitive skills (analysis, synthesis, evaluation, etc.)
  - Provides activities and projects for students to deepen their knowledge and cultivate and strengthen problem-solving and decision-making skills.
  - Provides opportunities for application of learned concepts.
  - Uses a variety of relevant charts, graphs, diagrams, time lines, and other illustrations to invite and motivate students to engage in discussion, problem solving, and other high-order thinking skills.
